GENDER SENSITIZATION ACTION PLAN

Nalla Malla Reddy Engineering College ensures gender equality and gender equity in all its academic and non-academic activities. To achieve this college has taken many measures. These activities are being carried out in college since its inception. We have even introduced a course approved by BOS with a proper devised course structure on Gender Sensitization for the B.Tech II year students of all streams of Engineering. It's an activity based course, where the students are encouraged to share, debate, and discuss issues in groups to bring in awareness among themselves about gender issues.

The college gives equal preference to female gender in assigning top and responsible positions in the cadre. There are three lady HODs in Nalla Malla Reddy Engineering College. Women and girls head most of the committees and clubs in the college. Every class has a girl CR along with a boy CR who coordinates with faculty for the smooth functioning of classroom activities.

The college strives to encourage its girl students as well as its female faculty in all their academic endeavours. The female faculty are provided ODs to participate in and attend conferences on par with men.
